Subject: Delta bad vision

I'm looking forward to hearing your comment / letter on the colapse of the Delta ecosystem, the horrific decline of the delta smelt and Central Valley Salmon stocks, and how do you plan on restoring the Delta's food chain that has been so negligently abused. Lets start by giving plankton a chance to recover by making deep cuts in water exports. Or is it easier to blame the Striped bass population that has coexisted in the Delta for over 100 years.

Californians will not stand by while you destroy our natural resourse.

Please take action now.

Sincerely David Schurr
